- **Backend Technologies:** Express.js, Node.js.
- **Developer Tools:** Postman, VS Code.
- **Databases:** MySQL, MongoDB.
- **Cloud:** AWS (EC2, S3, IAM, Lambda), Cloud Computing.

Projects

Institute Management System | Full Stack Web Application
HTML, CSS, JavaScript, React.js, Node.js, Express.js, MySQL

- The Institute Management System is designed as a centralized platform for the Directorate of Education to efficiently manage and monitor college-related data across multiple institutes. It focuses on improving data accessibility, reducing manual processes, and enabling smoother administrative workflows.
- It uses React.js with HTML, CSS, and JavaScript to build a responsive UI, while Node.js and Express.js power the backend. MySQL manages structured faculty and student data, ensuring efficient and scalable record handling.

Grocery App | Full Stack Web Application
React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Provides an online grocery shopping platform with separate user and admin access for smooth product management, order handling, and customer interaction.
- Enables users to browse items, add products to cart, set delivery details, and place online or offline orders, while admins manage inventory, update delivery status, and perform all product-related CRUD operations efficiently.

Text to Image Generator | Web Application
React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Provides an platform where users can generate images from text prompts through a clean and responsive interface.
- Enables users to enter prompts, view generated images, and navigate seamlessly using React Hooks and React Router, while the MongoDB backend stores prompts and image data for smooth processing.

Certifications

Web Development | IBM *Apr 2024*

AWS Cloud Practitioner Essentials | AWS *Oct 2025*

Hobbies

- Nature Photography.
- Learning new technologies.
